¹ A Russian armored brigade generally consisted of one Medium Armored Armored Battalion, one Light Armored Tank Battalion, one (mot) Machine Gun/Rifle Battalion, and an Anti-Tank Battery (4 76.2mm guns). The armored brigades in this order of battle show those battalions known to have been attached to the brigade and may not indicate every battalion that was present. It should be assumed that every brigade contained not only those units shown as present, but those that are part of the standard organization that are not shown.
